Postconditions(s)	Once the user has selected an emoji, according to that emoji, a song will play
Use Case Diagram	<Link or number, if present>

1.1.5 Past Recommendations (home page)

Title	Past Recommendations
Description	The user has the option to view past songs that the website chose to play for them.
Priority	2
Precondition(s)	The user needs to have used the website before.
Basic Flow	<ol style="list-style-type: none"> 1. The user logs in 2. Clicks on the past music tab 3. Display of past recommendations the website gave will appear
Postconditions(s)	A list of songs will appear if the user has used the website multiple times.
Use Case Diagram	<Link or number, if present>

1.2 Non-Functional Requirements

< List all non-functional requirements in the following example format

1.2.1 Site Loading

Title	Load to the site
Description	When logging onto the site, the user should be able to do so within 5 seconds.
Priority	4
Applicable FR(s)	1.1

1.2.2 User Safety

Title	User Safety
Description	User's login information will remain secure. The site will also not breach the music streaming service's information.
Priority	1
Applicable FR(s)	1.1.1 and 1.1.2

1.2.3 Mood Tracker Storage

Title	Mood Tracker Storage
Description	There should be support from the database to be able to store user data in terms of user moods
Priority	1
Applicable FR(s)	1.1.3

1.2.4 Encryption

Title	Encryption
Description	Messages should be able to be encrypted by the user
Priority	1
Applicable FR(s)	1.1.3

2. System Constraints

2.1 Tool Constraints

< List all tool constraints in the following example format >

2.1.1 Website Framework Constraint

Title	Website Framework Constraint
Description	Our website will be made with HTML and JavaScript for the backend of the website. We will use CSS for the front end elements.
Priority	Mandatory: 0

2.2 Language Constraints

< List all language constraints in the following example format >

2.2.1 Replit Framework

Title	Website Framework
Description	The HTML/CSS/JavaScript code will be made on Replit. The backend elements will be compiled as HTML/JavaScript. The frontend elements will be compiled as CSS.
Priority	0

2.3 Platform Constraints

< List all platform constraints in the following example format >

2.3.1 Website Platform

Title	Website Service Platform
Description	HTML/CSS/JavaScript would allow for the website to be presented on any browser.
Priority	Mandatory: 0

2.4 Hardware Constraints

< List all hardware constraints in the following example format >

2.4.1 Laptop/Desktop Requirement

Title	Required Laptop/desktop
Description	Since this is a website application, a laptop/desktop readily available.
Priority	Mandatory: 0

2.5 Network Constraints

< List all network constraints in the following example format >

2.5.1 Connection Constraints

Title	Connection Constraints
Description	The site must always be connected to a reliable source of internet connection to successfully run.
Priority	Mandatory: 1

2.6 Transition & Support Constraints

< List all transition & support constraints in the following example format > //delete

2.6.1 Transition & Support Constraints

Title	Transition & Support Constraints
Description	Since the site is supported by HTML/CSS/JavaScript, the transitions throughout the website will all be done through JavaScript.
Priority	Mandatory: 4

2.7 Budget & Schedule Constraints

2.7.1 Budget Constraints

Title	Budget Constraints
Description	There is no budget for this project.
Priority	Lowest: 5

2.7.2 Schedule Constraints

Title	Schedule Constraints
Description	This project must be completed by the end of the Spring 2022 semester.
Priority	Highest: 0

2.8 Miscellaneous Constraints

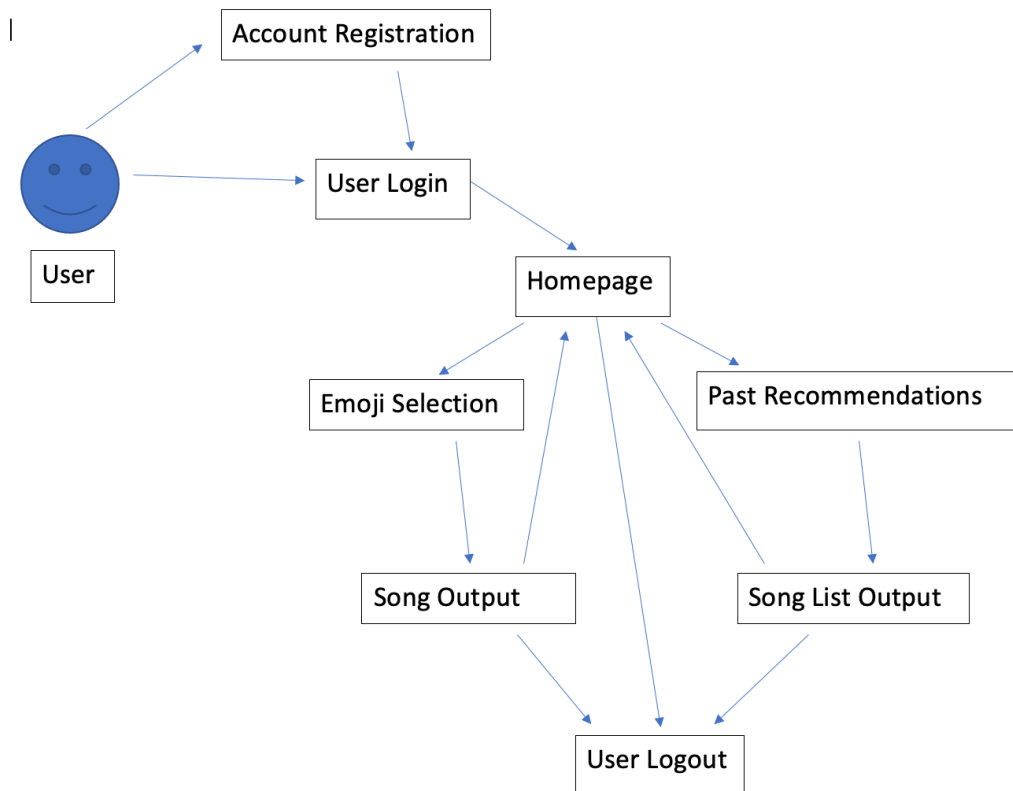

< List all miscellaneous constraints in the following example format >

2.8.1 Interface Constraints delete

Title	Interface Constraint
Description	We will be building the interface for the website using HTML/CSS/JavaScript on Replit.
Priority	Mandatory: 4

3. Requirements Modeling

3.1.1 User and System

4. Evolutionary Requirements

4.1 Functional Requirements

4.1.1 Link to music streaming services

Title	Link to music streaming services
Description	When the user creates an account, they must use their login information from an existing music streaming platform (Spotify or Apple Music). Using the data from their current liked songs, artists, albums, and playlists, the song output will be formulated.
Priority	0 (Mandatory)
Precondition(s)	User must create a have an existing account with Apple Music or Spotify.
Postconditions(s)	User saves song recommendations to profile
